## Work Experience

### Front End Developer (Dec 2023 – Till Present)

*P3 Financial Group (Karachi)*

#### Job Description:

- Developed and maintained dynamic web applications using React.js, Redux Toolkit, and Material UI, improving user experience and expanding service offerings.
- Contributed to agile processes and resolved critical issues, boosting application stability.
- Developed REST APIs for CRUD operations , optimizing admin workflows.
- Addressed SEO and meta issues using Next.js, resulting in a significant improvement in the website's search engine ranking.
- Implement Chart.js, Localization and Google Maps (clustering).
- Gained proficiency in TypeScript while working with web application in Next.js, enhancing code quality and maintainability.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Participate in code reviews and provide constructive feedback.
- Stay updated with the latest industry trends and technologies.
- Fix bugs and modify existing features to enhance app performance.

## Projects

### Soneri Bank (Official Website)

This website is made with Next JS and Type Script.

#### My Role:

- Eliminate the responsiveness issues exist on the UI for better user experience on different screens.
- Integrated third-party services using @next/third-parties in Next.js.
- Implemented and enhanced features for the Soneri Bank website, improving functionality and user engagement.
- Performed bug fixes and implemented modifications to improve website performance and reliability.

## Internet Banking (Soneri Bank Project)

This project is made using React, Material UI and Bootstrap.

### My Role:

- Understood and analyzed the existing codebase.
- Worked on various code flows to improve functionality.
- Developed and integrated device functionality to determine biometric authentication requirements.
- Handled API responses effectively using middleware for better error management.
- Resolved dark mode issues to ensure consistent user interface experience.
- Applied changes in the UI required in the internet banking project.

## Soneri Admin (Report Project)

This project is made using React, Material UI and Bootstrap.

### My Role:

- Developed and maintained an admin panel for managing and generating tabular reports.
- Enhanced data visualization and user experience with dynamic and interactive table components.

## Soneri RDA (Digital Account Opening Project)

This project is made using React, Material UI and Bootstrap.

### My Role:

- Displayed varying document attachment options based on account type and user selection, ensuring that only relevant documents were shown for upload.
- Resolved multiple validation issues, leading to a smoother and more intuitive account opening process.

## Academic Qualifications

- **Bachelors of Software Engineering** (2021 – 2024)  
*UBIT - University of Karachi.*
